What is Anywhere Article?

Anywhere Article is focused on making journal content on Wiley Online Library more readable and portable, whilst also allowing rich information to be brought to the surface. It achieves these goals in the following ways:

READABILITY. Clean design. Superfluous information and unnecessary distractions have been removed so that readers can focus on the article. Figures can be viewed in context or separately, and easily navigated, browsed or downloaded.

FUNCTIONALITY. The new layout and sidebar tray allow access to important information, i.e. references, figures, publication history at any point in the reading experience, without losing their place on the main page.

MOBILITY. Whatever device you use - desktop, tablet, or mobile - the article will be presented to take best advantage of that device, always readable, always easy to use, wherever you are.
