INTERIOR DESIGN OF A RESIDENCE

It is a very important element in the design of a residence. It can be defined as the space between the walls and the ceiling. It is a very important element in the design of a residence. It can be defined as the space between the walls and the ceiling. It is a very important element in the design of a residence. It can be defined as the space between the walls and the ceiling.

IAED 202 HEALTHY LIVING IN ASMA BAHÇELER SCENERIO

Healthy Home must be analysed in terms of psychological mostly. Everyone wants to feel good, happy and peaceful at their home. If the home makes feel all of these, it is a healthy home. Therefore, while a home design, user profile is important.
My user profile is middle aged. Their hobbies are related to nature. They like nature. So my inspiration source is nature. I want to use peace of nature at the same time disbalance asymmetry of nature.

IAED 202 HEALTHY LIVING IN ASMABAHCELER

An elderly couple who live in Asma Bahçeler. The old man used to work as a newspaper editor, and he was going to the newspaper to work. He started writing to the newspaper weekly. On the other hand he travels home, before retirement, and doing an edition of a university. He started to make his own postage and opening his own office. They don't like anything traditional. They prefer to go to the cinema to watch a movie once or twice in a week. They have a daughter who comes to visit them often.

PARENT-CHILD
 There is a young mother, she is a psychologist and she is interested with far eastern philosophies. And she brought into the life style.

There is a teenager as son, he is a student of performing arts. And he is also interesting with dance.

I need to create a peaceful space for this family. They have own priorities and they have own interests, they respect and support each others.
