

# **IMPORTANT REMINDERS ABOUT 2nd FOREIGN LANGUAGES REGULATIONS TO BE PUT INTO EFFECT AS OF THE 2020-2021 ACADEMIC YEAR**

Attention of students who will choose a Second Foreign Language!

Please read the following before selecting a second foreign language as this preference is an important one for your professional life:

Please select the language that you think will benefit your career and you will enjoy learning. Please remember that learning a language is a pleasant journey which will take you to different worlds.

- The language you choose can be changed **only once** throughout your entire academic life.
- When you successfully complete the mandatory second foreign language courses, **as university electives, you can only take 301, 302, 401 and 402 coded courses of the language you select as your mandatory language.**
- The mandatory second foreign language course from a previous semester is a prerequisite for the mandatory second foreign language course of the following semester. **To enroll in a second foreign language course, you must earn a grade of at least DD from the second foreign language course of the previous semester.**
- **Students who do not have a mandatory Second Foreign Language course in their programs can only select one second foreign language as a university elective.**
- When you complete the mandatory second foreign language education, you can certify your language skills and competency. At the end of the first two years, we highly recommend that you sit the certificate exam of the language you have learned. You can use such certificates for your academic studies and certainly after your graduation. These internationally recognized certificate exams are coordinated by the School of Foreign Languages.
